

Dear Sir, I sincerely hope XM radio will be able to broadcast even more weather and traffic information

I am an Englishman truck driving here 8years ,and 25 in europe

Try to imagine how we,drivers can plan ahead and adjust our routes,to match the Weather and road conditions

This is a vital service for travelling members of the public ,in times of bad weather.Also one can keep track of conditions wherever one`s loved one`s may be in the country
